I fully oppose anymore rate increases from duke energy!!!! They hold us hostage in our own homes.... They raise the rate every chance they get (each year) and this commission could stop it. If you allow this nearly 17% raise in rates it is apparent that this commission has lost it responsibility to protect the public.

In this bad economy with Americans already struggling to pay their bills how can anyone expect a 17% increase??? When is the last time your pay rate went up 17%???.... NEVER, because it is unrealistic!
